

## Readme

World Scientific has produced a style/template document for MSWord, which will allow authors to prepare manuscripts that can be brought directly into the World Scientific production process for CRC titles of the proceeding size [9.75 in x 6.50 in]. This will enable more accurate production of page proofs, reducing your need during proofreading to locate typographic mistakes.

### Installing the style file

The World Scientific Word templates and sample files are located on the website in a zip format called **ws-procs975x65\_word.zip**. Download and unzip this. Once unzipped successfully, you will find the following files:

procs-readme975x65\_word.pdf : preliminary guide  
ws-procs975x65\_word.dot : style/template file  
ws-procs975x65\_word.pdf : sample typeset pages using the above listed templates

### Using the style file

Please copy all the “\*.dot files” onto your default templates directory (this will normally be something like C:\Program Files\Microsoft Office\Templates).

- To create a new document, choose **New** from the **File** menu, then select the appropriate template from the **Template** list box before clicking **OK**.
- To attach the template to an existing document, first open the document, and then select the appropriate **Template** from the **Tools -> Templates and Add-ins** menu. Press the “**Attach Button**” in the **Templates and Add-ins** dialogue and double click the appropriate template/style file from the file selector. Then ensure that the “**Automatically Update Document Styles**” check box is crossed before clicking on **OK** in the **Templates and Add-ins** dialogue. It is also necessary to run the macro “**WS PROCS 975x65**” to have a required page layout when you attach the template to an existing document.

Whichever method you have used, the World Scientific styles will then be available in the **Styles** list box on the tool bar, and in the **Style** dialogue box on the “**Format**” menu.

### Applying World Scientific styles to your documents

To use a style, first select the text to which you would like to attach the style, then choose the style name from the styles list box on the tool bar or by using `wsprocs975x65` ToolBar.

## Applying World Scientific styles to your documents

The World Scientific styles are listed below. To use a style, first select the text to which you would like to attach the style, then choose the style name from the styles list box on the tool bar or by using wsprocs975x65 ToolBar.

<b>Style Name</b>	<b>Short cut Key</b>	<b>Style apply for</b>
Title	Alt+TI	Title
Author	Alt+AU	Author
Affiliation	Alt+AF	Affiliation
Abstract	Alt+AB	Abstract
Heading 1-4	Alt+1-4	Headings 1-4
Text, Text Indent	Alt+SP Alt+TX	Para, Indented paras
Equation	Alt+EQ	Equations
Bibitem	Alt+BI	Reference item

In addition, use the Table and Equation facilities available in Microsoft Word as required.
